

Commercial Pilot Program – Cessna 172S (TAA)

A Commercial Pilot License (CPL) permits the holder to be compensated for flying, meaning that the pilot will now be rated to fly for hire. This license opens the door for a career in aviation as a professional pilot. To be eligible for a Commercial Pilot License, applicants must hold at least a private pilot license (PPL), but an instrument rating (IR) is advised. A second-class medical certificate is required to use commercial privileges. A minimum of 250 hours of flight time is required, including 100 hours of pilot-in-command time and 50 hours of cross-country flight. In addition, you will need at least 10 hours of instrument training and 10 hours in a complex aircraft.

Description	Number	Units	Rate	Costs*
Instructor Pilot (IP) Costs:				
Ground Instruction	15	Instruction Hrs	\$80.00	\$1,200.00
Flight Instruction	15	Instruction Hrs	\$80.00	\$1,200.00
